

## HubSync Gateway

The HubSync Gateway dashboard is a gamechanging, robust portal for tax, accounting and advisory professionals, delivering a consistent and singular client experience.

The centralized dashboard empowers firms of all sizes, providing seamless navigation across the audit and tax landscape. With access to HubSync's end-to-end platform, the HubSync Gateway offers real-time status reporting and customizable set-ups

for internal, corporate, and individual clients, ensuring 360-degree visibility regardless of size, complexity, or location.

Gateway demonstrates HubSync's commitment to revolutionize the tax and accounting industry by addressing long standing complications with modern tools and solutions, enhancing both the workforce and the client experience.

## Unique Features

### Visibility

Offers 360-degree visibility across your firm's overall tax/audit landscape, offering a real-time portal that provides a consolidated team view, granting transparency and visibility through dynamic dashboards. Clients benefit from instant status updates, fostering seamless collaboration and strengthening relationships.

### Analytics

Combines secure data acquisition, collaboration, real-time reporting, and advanced analytics. Dive deep into data with the ability to drill down and leverage built-in visualization tools, empowering teams to uncover valuable insights.

### Applications

Offers access to a full suite of audit and tax applications, all in one powerful platform. Easily retrieve documents, data, and apps through favorites and quick links, improving efficiency and simplifying workflows.

### Productivity

Provides notifications, recent activity tracking, task lists, and progress tracking, boosting productivity and ensuring timely completion of deliverables.

### Communication

Enhances client engagement through streamlined communication. Gateway enables direct access to engagement teams, facilitating real-time messaging and providing industry news feeds.

### Integration

Seamlessly integrates with a wide range of tax and audit-related applications, eliminating data silos.
